

Ready to Work Bull Sale

Wednesday 5th May 2021

12.30pm

At our Naracoorte Sale Complex SA

STONEY POINT PERFORMANCE ANGUS

11 PLUS PROFIT ASSURANCE

AVERAGE EBV'S EXCEEDED ANGUS BREED

Many of the sale bulls are indexing in top 1% of Angus breed. Using Stoney Point bulls will make sure your herd is right up there for all the critical performance traits, however, we do not compromise on phenotype. All bulls must be structurally sound.

BULLS ZOETIS i50K TESTED

This Genomic enhancing test on bulls where indicated using individual DNA provides extra certainty to the figures of the bull you purchase. It also means they are parent verified and the DNA figures confirm we are ahead of breed average.

BULLS SIRE VERIFIED

STONEY POINT 6 POINT HEALTH ASSURANCE

Surpasses Zoetis 5 Star breeder program.

ACCURATE AND INDEPENDENT MEASURING

All non visual traits are accurately and independently measured by recognised experts.

SEMEN TESTED

To ensure live sperm are delivered, we have semen tested all bulls and only those with more than adequate motility are being offered.

STRUCTURALLY ASSESSED BY INDEPENDENT EXPERTS

Dick Whale has structurally assessed all bulls in the sale.

REPLACEMENT WHERE STRUCTURALLY UNSOUND, INFERTILE OR INCAPABLE OF SERVICE – 1 YEAR BREEDING SEASON GUARANTEE

Any such bull that will be replaced or refunded providing no causal agents post leaving the Stoney Point Performance Angus property.

DEATH COVER

All bulls are insured for death including transit until 15th June 2021 and the insurance can be continued by the purchaser. Your investment is protected.

ANGUS AUSTRALIA

Our Sale Lot catalogue is prepared by Angus Australia. You can be ensured of the accuracy and truth of the figures.

PROVEN

Feedback from clients confirms that Stoney Point Bulls DO and STAY and produce feedlot performing progeny.

WELCOME

When we yarded these bulls for their semen testing , we said
“WOW! How good are these”

This line up of **Ready to Work** bulls is really showing what careful selection of matings (which takes some skill), combined with the best genetics can do to the resultant progeny.

The sale provides a range of types with many suitable for use over heifers and we are confident they are all herd improvers – the sort that bring a better bottom line.

We are also mindful that your replacement heifers will come from these bulls which is why we put so much rigour into cow selection – it is at the end of the day half the equation.

The market is buoyant and any investment in a good bull will be worthwhile.

Best of luck!!

At Stoney Point Performance Angus we use a natural technology that produces high quality, human edible protein, derived from solar energy locked within human inedible plants. The technology produces a natural organic fertiliser and is mobile and does not require fossil fuels.

The technology self replicates.

The technology is better known as Breeding Angus Cattle.

Bulls that DO, Bulls that STAY

MATING ASSURANCE

A working fertile bull in a well managed cow herd is our mutual aim. We strive to do our part in presenting bulls for sale by implementing stringent pre-sale procedures.

These involve:

1. Physical examination
2. Semen testing to ensure more than adequate motility of semen
3. Feeding a fertility ration in the weeks leading up to the sale.

In addition we provide the Stoney Point Guarantee as follows:

The Stoney Point Guarantee

All Stoney Point Performance Angus Bulls are backed by a 1 breeding season guarantee. In the event of a bull proving to be infertile, or incapable of natural service within 1 breeding seasons or 12 months (whichever comes first) of the purchase date, the vendor will credit the purchase price less the salvage value of the bull, provided the problem is not caused by injury or disease incurred since taking delivery.

Any claims must be made within 48 hours of occurrence and be accompanied by a relevant veterinary certificate.

The vendor reserves the right to obtain an independent veterinary assessment to confirm any claim.

It should be noted this guarantee is **NOT a substitute for the proper care of your bull.**

The sale day is not the end of the bull's life and caring for your bull post sale is still an important process:

1. Upon arrival ensure your bull is properly socialised
2. Pre-joining – reassess the bull for any injuries or issues likely to impact its performance with your cows – keep up the vaccinations
3. At joining, limit numbers to be served by a new bull and rotate if possible. Best results are obtained with multiple matings rather than single matings
4. Always monitor your bull and cows. Look for injuries or higher than expected numbers of cows still cycling after 3 weeks of joining
5. Post-joining re-socialise in a suitable paddock with adequate good quality feed but don't overdo the condition of your bull.

Insurance – we provide death including transit insurance to get your bull home for a few weeks after the sale. If you want to extend this cover or in fact include loss of use, your stock agent can help or contact us.

After Sales Service – at all times feel free to contact us with any concerns or further information for your bull.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

- PV : both parents have been verified by DNA.
- SV : the sire has been verified by DNA.
- DV : the dam has been verified by DNA.
- # : DNA verification has not been conducted.
- E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.
