

Stage 2A Dispersal Sale

28th SEPTEMBER 2022

**Commences 12 Noon AEST*
on**

 **AuctionsPlus**

**75 HBR HEIFERS
aged 12-15 Months**

*** Elite Genetics ***

*** Ready To Mate ***

* Please confirm times on the AUCTIONS PLUS website prior to sale.

SOME FURTHER INFORMATION ON THE STONEY POINT HERD DISPERSAL

BREEDING PHILOSOPHY

We have always sought to ensure our herd comprises real Angus cattle that **DO** and **STAY**. With respect to our females, they must get in calf then calve down unassisted and raise a calf that grows and grows yet retaining their complete structural soundness (udders, feet etc.)

STAGE 2A

This sale is the final of the sales that will see the complete dispersal of the Stoney Point herd breeding after 24 years of breeding based on superior genetic selection.

VIDEOS OF SALE LOTS

Photos and videos of featured sale lots will be available on the Stoney Point and AuctionPlus websites leading up to Sale Day along with weights.

SIRE VERIFIED - HBR REGISTERED

All Heifers presented for sale have been sire verified and are HBR registered.

STRUCTURAL ASSESSMENT

Our herd has been structurally assessed by Dick Whale (IBMS) over a number of years. With the combination of herds when the Coorong Designer herd was merged into the Stoney Point herd, very stringent structural parameters have been set and cows have had to be very good to stay in the herd.

ET

We have conducted an expansive ET and IVF program over a number of years including fully imported embryos and those purchased from Millah Murrah.

FERTILITY

At our recent Pregnancy Testing conception rates achieved were

95% - cows

90%+ - maiden heifers (93% in 2021)

CALVING EASE

In 2019 no calves were pulled, in 2020 one calf was pulled, in 2021 one calf from a heifer was pulled. None in 2022 so far.

PALPATATION

All heifers have been manually palpated to assess suitability for breeding.

Stoney Point Stage 2A Dispersal Sale

WELCOME

We come to the final stage of our female dispersal-STAGE 2A, the remainder of our S heifers that were too young to put up in our March 2022 Sale.

These young ladies have been leisurely grazing away in the past few months and have reached mating weight. They have not been grain fed so fertility should be good along with structure retention.

All have been manually palpitated to ensure they are suitable for breeding... So they are ready to go!

They been through our superior health program which is another big plus.

Inspection at our property at Meningie* will be available from 2pm on the 27th September – please contact Peter on 0428 723 640 to arrange an appointment.

This is a great opportunity to boost your genetic footprint. We even have heifers from the now famous *Perry the Bull*

Perry Gunner – Stud Principal 0418 758 683 • Peter Colliver – Stud Manager 0428 723 640

*LOCATION OF STONEY POINT – 5722 Princes Highway Meningie 5264
7km South of Meningie on RHS of Princes Highway if heading from Meningie towards Kingston

Stoney Point Stage 2A Dispersal Sale

SALE INFORMATION

SELLING SYSTEM

Sale will be conducted under Auctions Plus Helmsman conditions. Selling price will not include GST.

AM – NH – CA – DD

All sales stock selling are either free of these defects by parentage, or have been tested free. No carrier heifers will be offered for sale.

JOHNES STATUS – the Stoney Point herd is JBAS6.

REGISTRATION

All sales stock selling are Herd Book Registered (HBR) and can be transferred at no cost. Buyers should indicate their requirement in writing.

SETTLING AGENT

Spence Dix & Co

EMBRYO TRANSFER

Note lots 54-75 are ET heifers from our DONOR COWS

INSPECTIONS

Sales stock can be inspected from 2pm on 27th September. We encourage buyers to inspect the sales stock prior to sale. This give us the opportunity to assist in selection of genetics to best fit your herd. Please contact Peter Colliver or Jonathan Spence.

REBATES

A rebate of 1% is allowed to agents nominating buyers to the settling agent prior to the sale.

DELIVERY

Please organise with your agent to arrange delivery. They can contact Peter Colliver on 0428 723 640 for further information. All heifers must be departed within 7 days of sale.

SEMEN

Selling price is per straw.

Stoney Point Stage 2A Dispersal Sale

The Coorong

THE CLL FACTOR

The **CLL FACTOR** as we call it, refers to the Coorong and Lower Lakes. Our property is jammed between the Coorong and Lake Albert, only a few hundred metres from the Great Southern Ocean.

This environment provides us with a cool maritime climate with the Coorong doctor arriving early afternoon that dramatically reduces temperatures in summer and we never exceed heat load levels even during the hottest of summer months.

In winter the sea mass keeps frosts at bay and pastures growing.

Our soils are calcareous deep sands with plenty of limestone which are wonderful for bone development. Lucerne and veldt grass grow prolifically with annual grasses bulking up the feed base in winter.

Our cows and their calves lead a stress free life with little in the way of health issues – *ideal growing out conditions*.

Having sandy soils means a real focus on feet, we can't hide any issues and must apply constant and earnest diligence to feet and in fact all structural parameters.

Stoney Point Stage 2A Dispersal Sale

SEMEN LOTS

We are offering in the sale 10 lots of semen no longer required.

A number of the lots are fruit salad lots comprising a number of different sires and thus variety. The rest are single sire lots. Most of the sires are popular contemporary sires but there are some blasts from the past.

B/R New Design 036, the most predominant sire of the global Angus breed and **Hyline Right Time 338**. These are rare lots but still have good numbers.

In fact we came across a 1990 sale catalogue claiming there were only 2 straws of 036 left – 32 years later we bob up with 7. Back to the future?

The **Stoney Point** sires offered are well proven sale toppers i.e. ones we have been able to closely observe over the years both for the retention of their own structure as well as that of their progeny who have sold extremely well. They include **Nolte** and **Perry**, both performing exceptionally well in the Angus Society's Benchmarking Study – see Society's website for updated details Cohorts 10 and 11. **Nolte** was purchased as a sale topper by *Glenavon* and continues to produce his own sale toppers for them. At *Glenavon's* recent sale the two equal 2nd sale toppers

(at \$28,000) were both sired by **Nolte**. **Perry** of course has received the ultimate accolade being named as the

Commonwealth Games Mascot – **PERRY THE BULL**

Lovis who has always delivered standout progeny and also produced many sale toppers (against bulls from imported semen) and our super heifer bull **Momentum** who has remained in the herd as a result of his outstanding calving ease progeny.

Momentum was recently leased by a stud syndicate.

*All semen is stored at TLG Camperdown.
Purchasers will assume responsibility for storage, delivery and any other ongoing costs. Stoney Point will furnish the appropriate release authorities to TLG.*

PERRY THE BULL

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

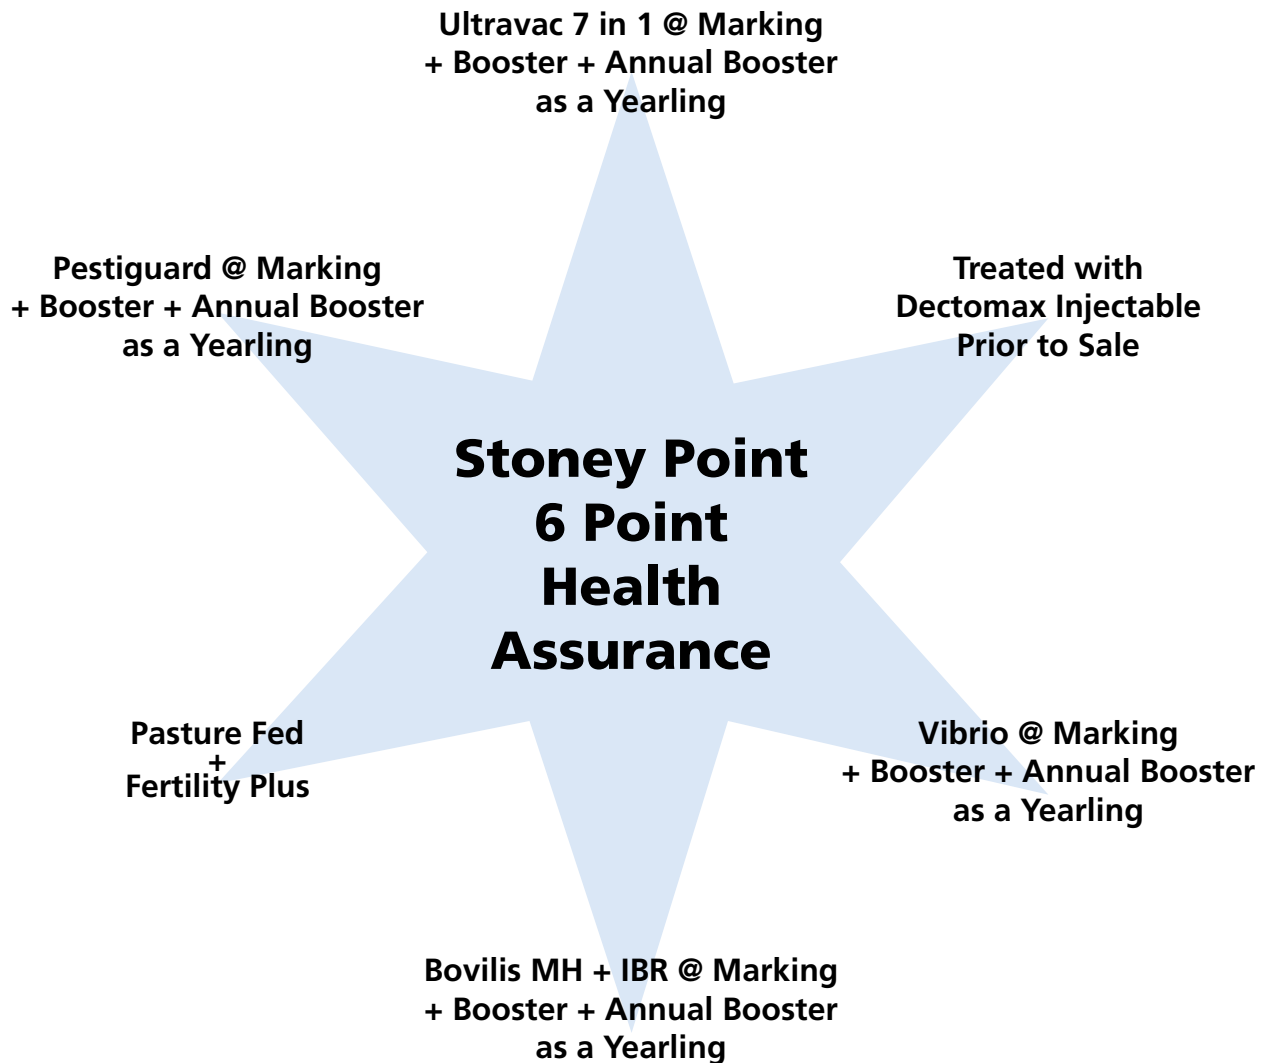

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDir	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcass	CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

HEALTH ASSURANCE PROGRAM

This Program exceeds the Standard set out by the Zoetis 5 Star Breeder Program.

7 in 1

Ultravac 7 in 1 prevents spread of Leptospirosis (which can affect humans) and protects against Clostridial diseases (blackleg, Tetanus, pulpy kidney, black disease and Malignant oedema).

Pestivirus

Pestivirus is a highly contagious virus that reduces conception and pregnancy rates and results in poor growth rates of PI cattle. We treat all our heifers with Pestiguard.

Pasture Fed

Pasture fed to preserve fertility. Fed Fertility Plus

Vibrosis

Vibrosis is the hidden STD and a major cause of infertility and abortion. It is spread by infected animals and is controlled by Vibrovax.

MH/IBR

Whilst Bovine Respiratory Disease is mostly a feedlot issue it can occur in your herd and causes morbidity and mortality. Bovishield ensures your purchased animal has immunity.

Parasites

Dectomax presale ensures our stock are free of parasites at sale date.

Remember – boosters are required for 7:1, Pestiguard and Vibrovax.

Stoney Point Stage 2A Dispersal Sale

Important Notice for Purchasers

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Embryo Expected Average Progeny Values

Expected average progeny values are provided to assist breeders estimate the outcome of particular mating combinations. The actual EBVs for any individual progeny resulting from a particular mating are likely to vary from the expected average values.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au
